

# Focus on Physical Education

# Intent: Enjoy – Enquire - Excel

We aim to:

- Develop a love and **enjoyment** of physical activity and sport
- Build knowledge through a broad curriculum which encourages the children to **enquire** about new opportunities to be active and have the positive attitude to try new activities
- Offer high quality teaching with **high expectations** for all
- Build positive habits which promote a lifelong love of activity leading to active and healthy lifestyles

# Intent: the national picture

Why is sport and well being so important?

- 35% of Y6 children leave school overweight
- This is the first generation of children who are predicted to die younger than their parents
- Nationally lockdowns have had a negative impact upon the social and emotional health of our children
- Instilling positive life choices early can have a huge impact upon future prospects

# Implementation: How? (organisation)

- Every child at Glenfall has access to at least 2 hours of PE lessons every week
- Sessions are delivered in line with the national curriculum with teachers also given opportunities to add their own personal expertise to give additional opportunities
- PE sessions are enhanced through a broad extra curricular offering available to pupils via lesson with external coaches and clubs
- Our curriculum is based on our values: Enjoy – Enquire - Excel

# PE and Sport Premium

- We make use of the PE and Sport premium in a number of different ways – please see our PE and Sport premium budget allocation on our website for further details
  - Staff CPD
  - Access to fixtures and competitions
  - Increased in school opportunities
